IN HIGH-QUALITY
COFFEE**

TurboSteam Cold Touch

To further improve the TURBOSTEAM Milk4 steam wand, we designed the new **TURBOSTEAM COLD TOUCH**. Its main feature is that the outer surface of the wand is comforting and cold before, during and after it emits steam. The wand is coated with a special insulating, non-stick material. This solution makes the new TS CT wand easy to clean and prevents milk residue from sticking to it.

**Integrated bidirectional
Wi-Fi system**

You can remotely communicate with the **S20** via the integrated **bidirectional Wi-Fi system**, which makes updating software, setting recipes and customising background images simple and intuitive.

A HIGH-QUALITY BEVERAGE AND A LARGE DRINKS MENU

LaCimbali knows just how important every drink is for you and your customers. That is why the **S20** is designed to guarantee a wide and varied range to satisfy every palate, always with maximum quality guaranteed.

Daily washing cycles are automatically managed by the **AWS system**. This innovative system provides thorough, efficient cleaning, ensuring maximum hygiene with just one touch.

AWS automatic washing system

+ milk steaming

The C'2s/Classic is equipped with a steam wand that allows barista to make beautiful Latte Art creations and focus on the creative side of their role.

Key Features

175 espresso per hour
(at 23s extraction time)
170 hot water products per hour

Two products at the same time

Steam wand with Everfoam

e'Levelling

Super Traditional

Eversys' vision has always been to create a narrative between the worlds of traditional and super automatic machines.

In-Cup Quality

Our machines offer self-calibration, which promotes consistent in-cup quality with every use.

Perfectly Textured Milk

Our 2-step option works with the use of a traditional steam arm which enables you to texture milk by beverage type using a conventional wand for authentic visuals, theatre and skill.

Connectivity

In today's fast paced world of technology, it has become critical for businesses to possess the ability to communicate with their assets
