C'cup heater

Key Features

175 espresso per hour
(at 23s extraction time)
170 hot water products per hour

Two products at the same time

Steam wand with Everfoam

e'Levelling

Our Cameo was developed to be the machine that would first introduce our philosophy of Super Traditional. Since then, we have innovated to continuously define and grow the space between super automatic and traditional machines as a leader in our field, contributing to every chapter of our story with consistency, creativity, and substance.

SUPER TRADITIONAL

Coffee & Tea

The C'2c/Classic is a Cameo without steam module. Its high productivity – up to 175 espressos per hour, is ideal for medium-volume environments where ultimate in-cup experience matters most.

Super Traditional

Eversys' vision has always been to create a narrative between the worlds of traditional and super automatic machines.

In-Cup Quality

Our machines offer self-calibration, which promotes consistent in-cup quality with every use.

Perfectly Textured Milk

Our 2-step option works with the use of a traditional steam arm which enables you to texture milk by beverage type using a conventional wand for authentic visuals, theatre and skill.

Connectivity

In today's fast paced world of technology, it has become critical for businesses to possess the ability to communicate with their assets
